

FINDERS KEEPERS DOWNLOADABLE CODE WHEEL

Instructions are on the next page.

INSTRUCTIONS

Instructions to make the Code Wheel:

1. Print the wheels page onto card stock.
2. Cut out both wheels.
3. Carefully cut out the small box above the arrow on the smaller wheel.
4. Poke a hole in the center of each wheel.
5. Stack the smaller wheel on top of the larger wheel, matching the center holes. Insert a paper fastener through both holes to connect the wheels.

How to use the Code Wheel:

To encode a message:

1. Turn the smaller wheel until you see the letter you want to use in the small cutout window.
2. You'll notice that the number 1 is printed directly above the window on the smaller wheel. Look at the number on the larger wheel that is now lined up with the 1 on the smaller wheel. Write that number down.
3. Repeat these steps until your entire message has been encoded to a series of numbers. You can put spaces between the encoded words if you want it to be easier to decode. See below for an example of this.

To decode a message:

1. Look at the first number in the coded message.
2. Turn the smaller wheel until the number one on the smaller wheel lines up with the coded number on the larger wheel.
3. Write down the letter that shows in the cutout window on the smaller wheel.
4. Repeat these steps until you have decoded the entire message.

Try it out:

To test your skills, decode the message below.

7 17 1 26 11 9 26 4 6 15 3 18 6 26 17 15 6!
